

MAPPING CRITICAL THINKING FOR COMPANY SECRETARIES

Think wide, think deep, think forward via-radiant thinking.

COURSE INTRODUCTION

Critical thinking presents a systematic approach to problem solving, inquisitiveness, even-handedness, and confidence in reasoning. Demands us to rigorously question ideas, rather than accepting them at face value. Enables us to deploy structured problem-solving that provides clarity. Empowers us to choose the best information from multiple possibilities. Striking the balance between a healthy dose of skepticism and an equal measure of good judgement. And as we grasp the power of pathological, manipulative and reflective thinking, making us better critics of ourselves. However, effective problem solvers must think both creatively and critically, generating options and focused thinking on a larger perspective. Mapping critical thinking allows us to explore our critical findings on a level of big picture thinking that potentially opens us up to an endless world of probabilistic paths.
